PROFESSIONAL SUMMARY

Highly analytical Cybersecurity Professional and U.S. Military Veteran with a 100% accountability record for mission-critical hardware. Expertise in network security, threat intelligence, and virtualization (Proxmox/Linux). Proven ability to troubleshoot complex systems under pressure, transitioning a decade of operational excellence into a career in Cyber Defense and Incident Response.

TECHNICAL SKILLS

- **Security Tools:** Wireshark, NMAP, Active Directory, Azure Cloud Security.
- **Systems & Networking:** Linux Administration, Proxmox Hypervisor, TCP/IP, Raspberry Pi.
- **Programming:** Python (Automation), SQL, JavaScript, HTML/CSS.
- **Compliance:** NIST Framework, Cybercrime Incident Response, Security Compliance.

TECHNICAL PROJECTS

Enterprise Home Lab Environment | Proxmox & Linux Administration

- Architected a multi-node virtualized environment using **Proxmox** to simulate enterprise network architectures and attack vectors.
- Deployed and managed **Linux-based** servers and **Active Directory** instances to practice endpoint hardening and privilege management.
- Utilized **NMAP** and **Wireshark** for protocol analysis and network auditing to identify and mitigate vulnerabilities.

EDUCATION

Bachelor of Science in Cybersecurity | Full Sail University | *Expected March 2026*

Associate of Science in Information Technology | Full Sail University | *Graduated February 2025*

- **Certifications in Progress:** CompTIA Security+, CompTIA Network+, CompTIA Linux+, CompTIA, A+

RELEVANT EXPERIENCE

Patriot Missile System Repairer | United States Army

- Engineered technical solutions and performed quality control for the Patriot Missile System, maintaining 99.9% operational readiness.
- Managed 100% accountability for \$500,000 of sophisticated electronic hardware and diagnostic equipment.
- Interpreted complex schematics to perform high-level troubleshooting on integrated electrical and mechanical systems.

Engineer Equipment Mechanic | United States Marine Corps

- Analyzed and repaired high-pressure hydraulic and electrical systems, ensuring equipment availability for mission-critical deployments.
- Collaborated with cross-functional teams to standardize maintenance procedures and reduce equipment downtime.

OTR Professional Driver | Multiple Companies

- Spearheaded logistics and route optimization for the timely delivery of critical materials, maintaining a 100% safety record over 9 years.
- Ensured strict compliance with federal regulations and data-logging standards, demonstrating high attention to detail and integrity.
