PROFESSIONAL SUMMARY

Highly analytical IT professional and U.S. Military Veteran with a 100% accountability record for mission-critical hardware and diagnostic equipment. Combines a strong foundational knowledge of network administration, Active Directory, and software troubleshooting with over a decade of hands-on mechanical and operational experience. Proven ability to resolve complex technical faults under pressure, work independently, and easily meet the heavy physical demands of an onsite, industrial facility infrastructure role.

TECHNICAL & OPERATIONAL SKILLS

- **IT & Helpdesk Support:** Active Directory, Microsoft Office 365, Operating System Deployment (Windows/Linux), Technical Documentation.
- **Networking & Systems:** TCP/IP Networking, PFSense Firewall, Network Backups & Recovery, Wireshark, NMAP, Proxmox Hypervisor.
- **Security & Monitoring:** Wazuh (SIEM), pfBlockerNG (DNS/Traffic Filtering), User Access Controls.
- **Hardware & Logistics:** Component-Level Hardware Diagnostics, Technical Schematic Interpretation, Asset Tracking, Preventive Maintenance.
- **Physical & Safety:** Safe lifting up to 50+ lbs, ladder/height climbing, multi-climate environment adaptation, OSHA/FMCSA compliance.

TECHNICAL PROJECTS

Enterprise Home Lab Environment | Proxmox & Linux Administration (Nov 2023 – Present)

- Deployed a virtualized environment utilizing a PFSense firewall to segment network traffic and configured basic firewall rules.
- Implemented pfBlockerNG for DNS-level traffic filtering to block malicious domains and unwanted network traffic.
- Installed and configured a Wazuh SIEM manager to aggregate system logs, monitor endpoints, and alert on simulated security events.
- Managed Active Directory instances within the lab to practice routine user management, access permissions, and account troubleshooting.

Independent Technical Support | Freelance / Volunteer (2020 – Present)

- Provide on-demand hardware and software support for a private network of 15+ end-users, resolving operating system, connectivity, and peripheral issues.
- Diagnose and repair component-level hardware faults, including replacing damaged hard drives, upgrading RAM, and configuring home network routers.
- Perform system cleanups, malware removal, and software installations while providing patient, clear instructions to non-technical users.

PROFESSIONAL EXPERIENCE

Over The Road Professional Driver | *Multiple Companies, USA* (Aug 2014 – Nov 2023)

- Managed digital logging devices (ELD) and high-stakes data reporting to ensure 100% compliance with federal safety regulations.
- Demonstrated long-term professional reliability, operating independently under strict time-management deadlines.
- Maintained a 100% safety record while routinely inspecting heavy equipment and working in uncontrolled, extreme weather environments.

Patriot Missile System Repairer | *United States Army, El Paso, TX* (Jan 2008 – Mar 2010)

- Served as an electronics and hardware technician, interpreting 200+ complex technical schematics to isolate and repair system faults.
- Reduced critical system downtime by 70% through rapid diagnostic analysis and component replacement with Technical Manuals and hands on knowledge of the equipment.
- Maintained 100% accountability for \$500,000 of sophisticated electronic hardware and specialized diagnostic testing equipment.

Engineer Equipment Mechanic | *United States Marine Corps, Camp Pendleton, CA* (Jun 2003 – Jun 2007)

- Diagnosed and repaired faults in high-pressure hydraulic and mechanical systems to optimize the readiness of 50+ heavy-duty assets.
- Worked with other Engineering MOS's to fill in where departments were short staffed.
- Collaborated with cross-functional teams to reduce equipment downtime by 50%.
- Frequently performed strenuous physical tasks, including heavy lifting, climbing, and standing for extended periods in rugged field environments.

EDUCATION & CREDENTIALS

- **Bachelor of Science in Cybersecurity (B.S.)** *Full Sail University, Winter Park, FL*
March 2026
- **Associate of Science in Information Technology** *Full Sail University, Winter Park, FL*
February 2025
- Certifications in Progress: CompTIA Security+.
- Certifications Planned: CompTIA Linux+, CompTIA CySA+
